

ADAM SMITH

cadamsmith.dev@gmail.com | cadamsmith.dev | linkedin.com/in/cadamsmithdev | Eagle Scout

TECHNICAL SKILLS

Languages: C#, Java, TypeScript, JavaScript, Python, SQL, HTML/CSS

Frameworks/Libraries: ASP.NET, .NET Core, .NET Framework, Entity Framework, Bootstrap, jQuery

Data & Cloud: Google Cloud Platform, BigQuery, Dataform

Tools: Git, GitHub, GitHub Actions, Azure DevOps, Visual Studio, VS Code, Jira, Confluence, ServiceNow

EXPERIENCE

UKG

Atlanta, GA

Software Engineer II

Jun. 2025 – Present

Core contributor to UKG's Workforce Intelligence Hub, a BigQuery/Dataform platform that aggregates and anonymizes workforce metrics across 10,000+ enterprise tenants into industry benchmarks.

- Helped take the platform from early stage to production, shipping benchmarks across headcount, retention, hiring velocity, terminations, and scheduling — each with jurisdiction-level breakdowns and incremental processing.
- Built a multi-source integration layer unifying People Fabric and Workforce Ready tenant data with Salesforce metadata, NAICS classification, and company-size banding.
- Met the platform's privacy and data-governance controls — K-anonymity, dominance suppression, anomaly detection, and watermark validation — on every published benchmark.
- Built developer tooling and Python data-pipeline scripts, including AI-assisted benchmark generators that cut new-benchmark development from days to hours, and set up GitHub Actions CI/CD for Dataform execution and multi-environment deployments.
- Earlier on the team, contributed to Reporting Hub, UKG's multi-tenant reporting platform — delivering the Dashboard Favorites feature, an Ignite v7.12 design-system migration, and accessibility and automation improvements.

Auburn University Campus Web Solutions

Auburn, AL

Associate Systems Engineer

Jan. 2023 – May 2025

- Led and architected major projects while continuing to contribute heavily to development.
- Shipped over 200 changes to production, reviewed over 450 pull requests, and led 6 major projects.
- Led the migration of 79 on-prem web apps from IIS on Windows Server 2012 R2 to Windows Server 2022 (upgrading all to .NET Framework 4.8) and 60+ SQL Server 2014/2016 databases to cloud-hosted SQL Server 2022 — ahead of deadline with no serious production issues.
- Upgraded 24 apps from Bootstrap 3/4 to Bootstrap 5 with Auburn's latest branding, and built a shared masterpage-template library used by both ASP.NET Framework and Core apps.

Co-op Developer

Jan. 2021 – May 2021, Aug. 2021 – Dec. 2021, May 2022 – Aug. 2022

- Built and maintained 13 ASP.NET MVC web apps using C#, SQL Server, and Entity Framework, with responsive, accessible front-ends in HTML, CSS, JavaScript, and Bootstrap.

PROJECTS

dragon-bundles

C# · ASP.NET · NuGet

- A cross-runtime CSS/JS bundling library for ASP.NET, exposing a single API across both classic System.Web and ASP.NET Core to make migrating between runtimes painless.

catan-board-generator

JavaScript

- A randomized Catan board generator that scores each layout against six balance metrics, letting players regenerate until they land on a fair, playable board. Live at catanboard.app.

EDUCATION

Auburn University

Auburn, AL

Bachelor of Software Engineering, Minor in Mathematics

Aug. 2018 – Dec. 2022
